Crash Course on Global AI Governance

On a Rolling Basis

INTRODUCTION

The Crash Course on Global AI Governance is a 5-day in-person or a 3-month virtual program for individuals who already have an interest in AI-related issues and would like to know more about global governance's impact on the development and use of artificial intelligence. The course examines the current legal and institutional framework of global AI governance and proposes alternatives to rethink global governance as a means to achieve accountable, inclusive and democratic AI governance.

The program will consist of three components:

- Presentations from experts, professors, and civil society representatives
- Interactive discussions of case studies, debates, and workshops
- Visits to the European institutions or international courts

AUDIENCE

As this course investigates the correlations between AI issues and global governance, previous knowledge of politics, international law, etc., could be beneficial but is not required. However, participants should have a prior interest and/or understanding of AI issues and activism, be at least 18 years of age, and either be or have been enrolled in higher education.

BECOME AN AI AMBASSADOR

This course is also offered as part of the Center for United Nations Constitutional Research's Young AI Ambassadors (YAIA) Program. YAIA are young activists from around the world who multiply efforts and initiatives to promote effective AI governance. To become an AI ambassador, participants must meet the following requirements:

1. Take part in AI governance classes or a crash course.

2. Attend at least one of our Global Town Hall Meetings on AI governance or any other international AI governance events and take part in the discussions and brainstorming sessions there.

3. Take part in activism for democratic and better AI governance globally and/or in your community.

4. Individuals who meet these requirements will be certified as AI Ambassadors as recognized by the Center for United Nations Constitutional Research.

LEARN HOW GLOBAL GOVERNANCE SHAPES THE PLANET'S FUTURE

CURRICULUM

Participants learn about the fundamental principles of international law and how those apply to the AI context. The course outlines the development of AI governance and reviews key international organizations, legal instruments and policy frameworks that relate to artificial intelligence.

This course approaches AI governance from a critical perspective. Participants will learn about current proposals for achieving democratic and accountable AI governance through global governance reform and be given opportunities to brainstorm and debate governance-based solutions to the challenges posed by AI.

DETAILS

The course can be taken either virtually or in person. The virtual package includes recordings of presentations, seminars with discussions about the case studies, debates, and workshops. The in-person course will take place in Brussels, Belgium, at the CUNCR offices. All courses are offered in English. Travel and accommodation costs are the responsibility of the attendees. For registration and enquiries, email research@cuncr.org.

ABOUT CUNCR

The Center for United Nations Constitutional Research (CUNCR) is a think-tank focused on the United Nations Charter and promoting the constitutionalizing of the UN and international law to legitimize global governance and affirm the global rights of "we the peoples". Headquartered in Brussels, Belgium. CUNCR is a not-for-profit, independent organization with no governmental, religious, or partisan affiliation.
